

Nedan finns de 5 sprinterna som ingick i projektet dokumenterade genom de user stories som gjordes under varje sprint. Dessutom följer några Epics för appen samt hur Definition of done användes under sprinterna.

Epics

- As a questioner I want to make a decision based on a group's opinion, so that unnecessary discussions can be avoided.
- As an answerer I want to answer anonymously to prevent making any other user upset.

Definition of done

Om en user story inte hade uppfyllt "definition of done" innan sprinten hade avslutats fick den vara kvar till nästa veckas sprint. Definition of done gjordes som en checklista för user stories där det inte var helt tydligt när en story var klar. Nedan under några user stories finns exempel på hur en checklista för DoD kunde se ut.

Sprint 1

- As a questioner I want to be able to write a question and define two distinct answers
- As a user I want to be able to see all my received questions.

Sprint 2

- (5) As a user I want to be able to choose a question from my list to give my opinion
- As an answerer I want to give my opinion by two predefined choices so that it's easy to answer.
- (2) As a user I want to be able to view a list of the users whom I have added to the poll before I submit it.

Sprint 3

- (3) As a questioner I want to be able to have a list of friends from where I can add answerers easily.
 - Add function so you can mark friends in your list
 - Connect to the local database
- Rename variables to "poll" and "alternative"

Sprint 4

- (1) As a user I want to be able to log in to the app.
 - Error if empty fields
 - 2 fields + button to log in
 - Relocate to list-activity if success
 - Keep user logged in for session

- Make API connection
- As a questioner I want to achieve the result clearly so it is easy to understand the outcome of the poll.

Sprint 5

- As a questioner I want to be able to send my question to the friends I have selected to ask.

Vi strukturerade om koden och snyggade till appen.

Framtida sprints

- As a user I want to be able to add friends.
- As a user I want Facebook integration.
- As a questioner I want to be able to set a time limit for my question.
- As a user I want push notifications from the app.
- As a questioner I want to be able to select all of my friends with a single click.
